GEETA JAYANTI CELEBRATION

Srimad bhagvad gita is the holy book of hindus and gita jayanti samaroh is dedicated to the birth of srimad bhagvad gita. The festival is very sacred to hindus and is celebrated with immense religious fervour and dedication. Gita jayanti is the day when lord shri krishna explained the gita gyan to arjuna. It is observed on ekadashi tithi (11th day) of shukla paksha in the month of margashirsha and it is being observed on mokshada ekadashi i.e on 03-dec-2022. Tlc gurukul school celebrated gita jayanti to inculcate the values of gita in the students. We had special assembly which included gita poojan with melodious prayer, speech by arti kol which gave immense knowledge about gita and shree krishna. On that day we also had sanskrit shlok chanting competition for students of grade 1 to 9. All the students participated with spirituality. The winners of competition were given certificates and all gained knowledge of gita.

PURPLE DAY CELEBRATION

We think of purple as the colour of royalty and luxury. Consequently, it brings up a feeling of trust and reliability. Purple's rarity also gives it an air of mystery. It's associated with creativity and the realm of fantasy — think about how many times magic gets portrayed as purple in popular culture.

Our school had Purple Day Celebration for the Students of Pre-Primary on 9th December. All the Students were dressed up in different shades of Purple. They were taught about purple colour. Everyone bought some or the other things from their homes which was purple in colour. The classroom was decorated all with purple balloons. Students enjoyed making cone shaped cap out of purple paper and had done colouring activity. They enjoyed learning new colour with activities

FIELD TRIP

The word "PICNIC" is enough to bring smiles to the cherubic faces of students who just want to get away from the confines of the classroom and run free with the wind in their hair. So, it was no surprise to see students from (I - IX) of the school scream with delight when their picnic date was announced. The Picnic spots were Black Hills and White Rann of Kutch. The students board into the buses to travel ahead. All reached the first picnic spot Black hills there they worshipped the temple and then had a lunch at temple where they learn to eat and also clean their dishes after meals. There was a beautiful sightseeing point, from there each one of them saw a plain white desert ahead. After some refreshment all the students were again boarded to buses for second spot White Rann of Kutch. First of all the students were taken to children's park where they all enjoyed different games and puppet show. They found it very interesting. Then reached to white desert where all were excited to see the sunset. The class group photography was done. Picnics are indeed a source of recreation for the mind and body and instil the principles of sharing, teamwork, social interaction, regulation, and discipline among students. Students returned to school, tired but joyous at the end of the day.

SPORTS DAY

"Every job is a self-portrait of the person who does it. Autograph your work with excellence."-Jessica Guido Bono

If there is one field of life which teaches us the most valuable lessons about perseverance, patience in fact what constitutes a perfect character, it is sports.

Our School celebrated its Annual Sports Day on December 20, a sunny winter day. The Stage was decorated with festoons and bunting. The sports day started at 9:00 a. m. This Sports day was held between the four Houses of school that are TRUTH, LOVE, COMPASSION, PEACE. Races for different distances, three-legged race, sack race, lemon spoon race, one legged race, book balance race, tug of war and relay race were held. All the Students participated with great Enthusiasm and Sportsmanship. The winners were photographed. The prize distribution was done by our director sir, Principal sir and teachers. The winner house of the Annual sports day was Compassion house. The trophy was given by our director sir to the captain, vice-captain and teacher of the house. Light refreshment followed.

CHRISTMAS DAY CELEBRATION

Christmas is an annual festival commemorating the birth of Jesus Christ, observed primarily on December 25 as a religious and cultural celebration among billions of people around the world. A feast central to the Christian liturgical year, it is preceded by the season of Advent or the Nativity Fast and initiates the season of Christmastide, which historically in the West lasts twelve days and culminates on Twelfth Night. Christmas Day is a public holiday in many countries, is celebrated religiously by a majority of Christians, as well as culturally by many non-Christians, and forms an integral part of the holiday season organized around it. As we entered the school it all felt like Christmas as everything was decorated like a Christmas Eve. Everyone was gathered including students, teachers and Principal sir to witness the celebration of Christmas. The Function started with brief introduction of Christmas by the anchors. Shroyat from grade - 6 also shared his views on Christmas by a speech. There was a wonderful act played by students of class 5 to 7 which gave message to everyone. The title of the play was " Helpers on Strike". It gave message that helpers of God can never be off duty they are meant to work for good of people. Then the function was followed by dance performance by our tiny tots of Pre-Primary. What a great performance it was. After that an indo - western solo performance was done by one of student name Jiya Solanki of Grade - 7. The performance was so mesmerizing which everyone loved. After that the Santa came and distributed Gifts among his beloved children.

SCIENCE WRITE-UP

Some fish can do arithmetic

Can fish count? Admittedly, goldfish gamboling in the tank may not inspire much confidence, but Vera Schlissel of Bonn University in Germany is a little more optimistic. Schlissel's earlier work has shown that fish and stingrays have a wide array of cognitive abilities, including spatial memory, symmetry perception, color vision, object discrimination, and serial reversal learning. And now she may have evidence that they may be minor arithmeticians, too. The research done on cichlids and stingrays showed that they weren't just learning more versus less; they were learning addition versus subtraction – a cognitive skill that had no obvious use to them in the wild, and yet, was present in them.

MATHS WRITE-UP

Provide activities that enrich and relate mathematics to daily life:

- Talk about how many bowls to put out for dinner
- Fold napkins in different shapes
- Have your child count similar items as you put away groceries
- Have your child help measure ingredients for recipes
- Give your child change to count out to pay for small purchases at the store; have older children calculate the change
- Ask your child to compare prices of items by asking things like, "Which can of beans costs more?"
- Allow your child to weigh the fresh produce; have older children calculate the price by multiplying the price per pound by the number of pounds
- Read the days and dates on a calendar, talk about the number of days in the month, the number of days remaining until a special event, etc.
- Draw a scale map of your home and determine the best escape route in case of an emergency
- When traveling, write numbers on a grid and have your child colour in the box as they see the numbers on signs or license plates

- Check your child's assignment list daily
- Monitor daily work and be aware of the content being studied
- Use computer software or online games or apps to practice math skills at home
